

Airbus Helicopters Canada Limited Environmental Policy

Airbus Helicopters Canada Limited recognizes environmental protection as one of our guiding principles and a vital component of sound business performance. It is the policy of Airbus Helicopters Canada Limited to control our activities, products and services to minimize our environmental influences.

We will educate our employees and others working on our behalf to heighten their awareness and understanding of our environmental policy. Objectives and targets will be established with periodic reviews in respect to environmental performance, consistent with our aspects and impacts.

To the best of our ability, we will work to limit the consumption of natural resources to minimize the amount of waste generated and promote the recovery of valuable resources.

Our commitment to continual improvement will be encouraged throughout all departments and active participation by all employees will enable the achievement of our environmental goals.

While adhering to environmental laws, regulations, and other requirements, our company commits to pollution prevention by ensuring that all work will be done in an environmentally friendly manner.
