

Change your life – *Don't miss out on this great opportunity!*

We're looking for a **Quality Assurance Inspector, Composite** to join our team so if you or someone you know is qualified then we want to hear from you!

As member of the QA Team, reporting to the QA Supervisor, Composite, you will be a key contributor, taking quality and the quality control processes and activities to the next level, working collaboratively with our QA and Composite Production teams!

If your track record shows you can ...

- Provide regular dimensional inspection of composite and sheet metal parts
- Work with drawings, documents, process specifications, quality control requirements and procedures, perform any inspection of parts and assemblies including processes and materials
- Initiate and document any non-conforming material, hardware, tools, parts, assemblies according to specifications, processes and procedures.
- Perform in-process inspections (material bagging, trimming ,painting)
- Prepare and maintain effective documentation management and control for all quality reporting
- Work collaboratively and effectively with all team members in Quality and Composite to reach specified standards
- Use and interpret drawings, inspection manuals and specifications; use precision measuring instruments, specialized inspection machines, tools and equipment
- Work with ISO 9001 processes and in accordance with Ministry of Transportation requirements

And if you have...

- University Degree or Diploma from a recognized educational institution
- 5+ years previous work experience minimum, specifically with a Quality Assurance System (ISO 9001, AS 9100)
- Ability to work effectively under demanding delivery schedules
- Professional working relationships with internal and external sources, including regulatory and quality certified agencies
- Excellent verbal and written communication skills and the ability to prepare reports and business correspondence
- Strong problem solving, decision making, job task planning and organizational skills
- High technical aptitude

... then we want to hear from you!

To apply to this position, please provide an updated resume and a brief letter identifying how you can quickly and successfully become a productive key team member, along with your interests in this position to Human Resources by FRIDAY, JUNE 1, 2012. You can also email the requested documents to tara.overholt@eurocopter.ca.

*****Please be advised that only qualified applicants will be considered for an interview*****
