

## We're looking for a LEAN MANAGER to join our team.

### So if you or someone you know is qualified, then we want to hear from you!

Reporting to the President & CEO, and working closely with the LEAN steering committee, the LEAN Manager will be responsible for the successful introduction and adaptation of LEAN to the ECL organization. This exciting opportunity will involve the identification, development and execution of LEAN projects to drive improvement in process metrics, targeted financial benefits, and achieve company goals.

#### Your responsibilities...

- Developing and implementing an ECL LEAN program specific to our environment
- Training all team members for understanding and application
- Acting as the champion for transformational change within all areas where LEAN will be integrated
- Building effective relationships with key stakeholders at all levels and in all areas of the business
- Translating LEAN improvements into quantifiable metrics
- Ensuring timely communications on LEAN progress and implementation

#### If your track record shows you have ...

- Excellent collaborative, influencing, motivational and negotiation skills to ensure support and buy-in to cross-department initiatives
- Confidence, motivation, knowledge and hands on experience to act as an ambassador for LEAN and change leadership principles; the ability to manage, coach and motivate a project team
- Stakeholder engagement and management skills, including the ability to effectively question and challenge assumptions
- Excellent written, verbal communication and presentation skills; ability to provide professional instruction
- Strong project management skills
- Ability to analyze, summarize and problem solve complex issues and data

#### And if you have...

- Five+ years' experience in the management of lean programs with demonstrated in depth knowledge of formalized lean concepts, practices, and tools, preferably in a production or assembly environment
- Lean certifications, completion of course and concepts like Six Sigma, Demand Flow, Visual Management
- University degree in an area such as manufacturing engineering, industrial engineering, mechanical engineering, engineering technology or equivalent is preferred, or equivalent combination of education and experience
- Previous experience in a multi-national organization would be preferred

*... then we want to hear from you!*
