Change your life – Join our team!

We're looking for a highly talented MANAGER, QUALITY ASSURANCE so if you or someone you know is qualified then we want to hear from you!

Reporting to the Director, Quality Assurance, the Manager, Quality Assurance has in large part responsibilities for all quality activities within ECL Quality Management Systems, including aircraft maintenance activities and the manufacturing areas.

Your responsibilities...

- Providing leadership developing and directing QA and quality improvement initiatives
- Monitoring QA systems and advise on system performance; utilize statistics regarding performance against set goals
- Collaborating with clients to ensure full customer satisfaction
- Maintaining a QA program for monitoring supplier quality, including audits, and controls
- Conducting risk analyses, verification, validation activities, and formal design reviews
- Promoting and advocate quality achievement and performance improvement
- Acting as a liaison with external auditors and assume responsibility for ensuring effective root cause analysis and follow up to ensure effectiveness of corrective actions
- Ensuring ongoing compliance with local, national, and international standards and legislation
- Creating and maintain QA control documentation
- Identifying relevant QA training needs and opportunities

If your track record shows you have ...

- A professional approach to undertaking the role and responsibility of Quality Assurance
- Good vision and strategic thinking for the planning and development of programs and methodologies
- Sound capability to produce meaningful metrics and analysis to report on progress
- Collaboration skills to engage the various departments
- Strong problem identification (root cause analysis) and problem resolution skills
- Excellent communication skills, listening skills, organizational skills and ability to prioritize effectively
- Sound diplomacy skills ability to interact at all levels and with cross functional teams

And if you have...

- A minimum 10 years of direct work experience with QA systems, regulations, guidelines, leading QA teams and associated standards
- Experience in implementation and management of ISO certification programs
- Risk management, product testing capability studies
- Knowledge of aerospace QA methodologies
- ASQ Certifications Preferred – CQM, CQA, CQE
-

... then we want to hear from you!
