

Eurocopter today, the World's Number One Helicopter Manufacturer!

Established in 1992, the Eurocopter Group is a Division of EADS, a world leader in aerospace, defense and related services. With approximately 20,000 employees in 30 subsidiaries on five continents, customers can rely on Eurocopter to ensure all activities of support, service and training are provided with best in class service.

Eurocopter products account for 33 percent of the total world helicopter fleet, a success based on its comprehensive range of civil and military helicopters.

We're different! As an employee of Eurocopter Canada Limited (ECL), you will have the opportunity to showcase your talents and make meaningful contributions to the exciting field of Aerospace. ECL employees take pride in their work and look forward to the challenges this industry brings.

ECL offers personal development for our employees with an active career, responsibility, and opportunity for international mobility.

Change your life – Join our team!

We're looking for a highly talented REPAIR & OVERHAUL (R & O) TECHNICIAN so if you or someone you know is qualified then we want to hear from you!

Reporting to the R & O Supervisor, the R & O Technician will be responsible completing initial assessment and the completion of repair and overhaul work with a customer focus, attention to deadlines, accuracy in completion of work and upholding high standards of quality.

If you can...

- Review and complete all documentation ensuring accuracy and completion
- Complete initial inspection of part for damage
- Build up overhauled and repaired components as per applicable manuals, following quality directions and processes
- Carry out applicable testing procedures
- Pre-paint re-worked metal surfaces as required
- Ensure quality control standards are met; following applicable QA documentation, monitor build-up process and sign-off sheets for correct inspection and approval of steps
- Complete log cards and certification of component and close out work order when completed
- Prepare finished component for shipping in approved shipping container
- Prepare part for QA stamping and ensure stamp is completed as required

And if your track record shows you have ...

- Aircraft and aircraft component working knowledge
- Mechanical aptitude and experience in manufacturing environment
- Ability to interpret technical manuals and documents
- Critical thinking skills; able to identify and trouble shoot issues

And if you have...

- Manual dexterity; attention to detail and precision
- Focus on delivering high standards of product quality and safety
- Communication skills; able to effectively communicate across various levels of the company in a team environment
- Independent action and problem solving; able to solve day to day issues and work under general supervision
- Flexibility in ongoing change and learning; adaptive to new requirements and technique
- Self-motivated, ability to work with minimal supervision as well as part of a team

... then we want to hear from you!

To apply to this position, please provide an updated resume and a brief letter identifying how you can quickly and successfully become a productive key team member, along with your interest in this position to Human Resources to HR@eurocopter.ca.
